

# Haushahn Media Network Real-time communication and infotainment

The Haushahn Media Network is a high-quality media solution that transforms your elevator into an infotainment and communication tool. As a media application in the elevator car, the Haushahn Media Network delivers relevant content – in real time and with minimal effort. With it, you can present the latest news or weather information and attractive advertising content with a high level of attention, enabling your passengers to always stay up to date.

## Advantages

### **Ideal level of attention**

Thanks to its positioning in the elevator cabin, the Haushahn Media Network ensures that your passengers are really aware of what's happening in and around the building.

### **Maximum up-to-dateness**

All interesting content and information can be played out at different locations at set times – simply, flexibly, in real time and remotely.

### **Enhanced elevator experience**

Add value for your passengers with the Haushahn Media Network: The simple elevator ride becomes an impressive experience with targeted infotainment.

### **A one-stop solution**

The Haushahn Media Network is free of charge for our customers. Haushahn covers all the costs for setup, maintenance and support services – including software updates and current content such as the weather and news.

## Real-time communication and infotainment

### Real-time information

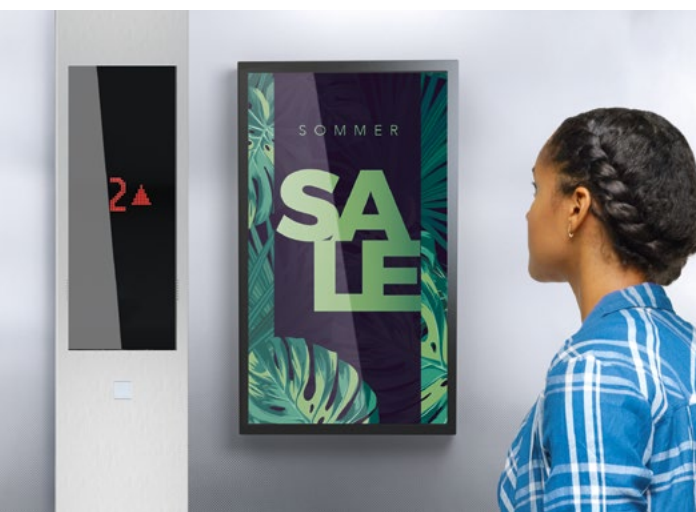

Turn any elevator into an in-house communication tool: the current lunch menu, short-term maintenance work or an event on the roof terrace – with the Haushahn Media Network you can always keep tenants, guests and employees up to date.

### Excellent size

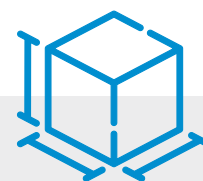

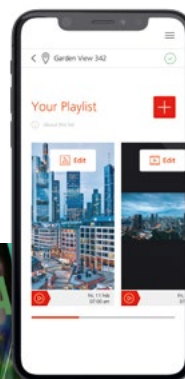

The Haushahn Media Network is available as a 32-inch screen diagonal. It's the perfect size for important information and building-related updates.

### Easy content management

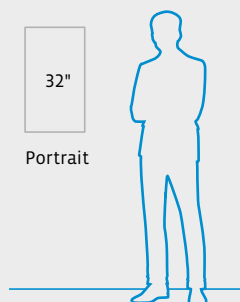

You can upload any relevant content you like to the Haushahn Media Network in just a few simple steps. The user-friendly mobile application makes it possible to plan and update content in real time – easily, from anywhere and via any device. With predefined format templates, you ensure that digital communication in your building gets noticed.

Content is easy to update from anywhere – from any device.
